

# Anti-Bacterial

## Washable & Fully Submersible Keyboard

- High quality, stylish keyboard
- USB-PS/2 combi keyboard
- Laser printed key caps, will never fade
- Ergonomically designed for comfortable use
- Noise free structure, provides a quiet typing environment
- Durable keys, 10 Million keystroke life
- Plug & play set-up
- Compatible with Windows: XP/2000/2003/ME/98/Vista

**A POWERFUL** anti-bacterial coating **INHIBITS** the growth of **BACTERIA** helping to **PREVENT THE SPREAD** of **GERMS, BUGS & FLU VIRUSES**

**PERFECT** for **HEALTHCARE ENVIRONMENTS** where cleanliness is **PARAMOUNT**

**WASHABLE & WATERPROOF** therefore allowing the keyboard to be **FULLY SUBMERSED & DISINFECTED**

An antibacterial coating has been added to this keyboard containing a material known as Triclosan, which inhibits the growth of micro-organisms such as algae & bacteria, by using an electro-chemical mode of action to penetrate & disrupt their cell walls.

When the cell walls are penetrated, leakage of metabolites occurs and other cell functions are disabled, thereby preventing the micro-organism from functioning or reproducing. Triclosan, is widely used in a variety of applications, It is the ideal product to guarantee hygienic properties for many finished goods, like: cosmetics, tooth pastes, shoe insoles, mats, hospital supplies & others, it's considered safe for human and the environment.
